

Research Data Australia Home

Documentation Home

Welcome to the Research Data Australia documentation page.

Explore how to become an RDA contributor, understand RIF-CS, learn how to manage records in RDA, get familiar with the RDA-related widgets and APIs and find out what changes have been implemented, scheduled or planned. Also find out how to implement your own RDA in your organisation. As a researcher, learn how to use RDA portal for searching and reusing datasets, discover services, people, organisation, grants and projects and also learn how to export records to ORCID and EndNote.
